

SUMMARY

I dedicate this book to the Serbian people as a gift and a warning that must to returned real knowledge about that we have been for millennia largest and oldest people on earth marks

OBRAD Ž. MARIČIĆ

AUTHOR'S FOREWORD

Starting back in 1956, when I first sensed that something strange was happening to the real history of the Serbs, that the real history was being hidden from us, to this day, I have spent almost my entire life to learn more about who we, the Serbs, are.

I do not know the number of people I've met throughout my life and saw that many of them learned by various sides that something was really wrong with our history. In a fateful course of events, a huge number of researchers of courageous spirit and a sharp pen have appeared, and the Serbian numerous and dedicated intelligence have undergone the hard work of CONQUERING THE TRUTH.

I was honored to have personally known and hung out with actual connoisseurs of the history of Serbs. There are so many books already published on this subject that, I can freely say, the truth has finally COME TO LIGHT.

I wanted to express one of those truths through poetry, and that's why I published a book of poems "ANTIQUE CALL OF TRUTH". In it, I wanted to express some of this new knowledge through my poetic vision and to speak to the public in a poetic way, as someone who can reach out by word to new people who are very dear to the truth.

Since in the Diaspora I used to be and have remained a zealous worker in the field of truth about the Serbs, I and some other people started to organize gatherings of all kinds with our people, and start publishing articles in magazines and books in the diaspora, notably in Germany and Switzerland. The feedback was great, so the association SARDONIJA gave the initial impetus for the work and socializing. Also, in the homeland of Serbia, I gained a lot of wonderful friends and people, such as: Vesna Pešić - publishing house" Pešić and the Sons, Miroslava Petrović - publishing house" Miroslav", Academician Dr. Srboljub Živanović - England, Academician Dr. Radivoje Mančić - President of the Serbian Learned Society, Academician Dr. Radomir Djordjević - President of the association "Serbon", Slaviša Djordjević - a writer, etc., who has carried the same idea thus providing an invaluable contribution by publishing books, magazines, holding lectures, scientific meetings etc.

It's happened at the proposal of my great friend Milos Grozdanović, my dear Nishlian to whom I owe gratitude for the friendship and the organization behind the promotion of my book in Nis and Gadžin Han, I do this book that should be some kind of compilation of all the successes in the uncovering of the real Serbian history.

There will be, apart from my work, lots of papers coming from the pen of local and foreign researchers, who emphasize the significant achievements in all fields of science.

The world science is grabbing forward in such an obscure way, and we have to join it.

Title of the book "Historical parallel of Serb for millennia" should point out several things.

First, the Serbs were and still are a great historical people.

Second, the Serbs have a parallel life: a fake one in real life, with reduced history, and another, secret life with a real history.

Third, the age of the Serbian people didn't appear in the seventh century, as we all learned, but the Serbian people have lasted through the centuries.

Let the three colors of the Serbian red, blue and white tricolor be the basis that will speak boldly through the title of the book, and give one more reason to encourage the Serbs as a people and make them realize that science has given a new verified scientific world view.

Associate professor Dr. Srboljub Zivanovic has showed that genetics is a leading science that points to the fact how one nation is old, shows its movement, and its starting point. Geneticist at Harvard University, USA, Dr. Anatole Kljosov indicates that the Serbs are very old nation, over millennia. This must be taken into account.

Slaviša Miljković indicates that the language is multidimensional creation which has its automaticity and shows that there are serbisms in other languages, not just foreign words in the Serbian language.

Milos Grozdanović, like many in the world, took mathematics into account and showed that it is the key solution to the historical misunderstandings.

The other papers in other areas relevantly show improvements in knowledge, and I invite all my friends and the entire public to finally speak out on this topic.

Both I and all actors in this book are the bearers of relevant knowledge that stands against the doctrine Vienna - Berlin school with its selfvigour, wishing that all written by local and foreign authors finally come face to face and the scientific from unscientific be clearly separated.

Much is spoken about the alleged thesis of Constantine VII Porphyrogenitus on the arrival of the Serbs in the Balkans in the seventh century AD. Numerous works of local and foreign authors suggest that this is a bad document, and one of my best efforts was to not only finally demystify his work "De administrando imperio", but also to define the position and place of the Serbs as a people in an entirely different way.

Some texts are really difficult to read, but science has never been easy, especially not when it comes to SERBIAN HISTORY.

Obrad Ž. Maričić

Historical parallels of Serbian people through millennia

"Slavic peoples occupy more space on earth than in history ..."

Herder

With these words famous French historian Francis Kont began writing his history of Slavs and Slavic origin of civilizations in Europe. The book was translated in Serbian language and published in Belgrade in 1989, entitled "Slavs."

The author of the book "Historical parallels of Serbian people through millennia" is Obrad Ž. Maričić while reading the books of various authors and examining many documents, he realized the inductive message that Slovenian people occupy more space on earth than in history. By studying the history of European peoples and their cultures, literacy, language and archaeological legacy he found that the Serbs as the indigenous population were settled along Danube and the Balkans and spread their influence and left traces of their presence from Baltic sea in the north to the Mediterranean and northern Africa in the south, from the Far East and India in the east to the British Isles in the west.

The science in Serbia and abroad, especially in Europe, as well as the teaching of history in contemporary schools imposed a number of limitations upon the understanding of teachers and students, whose knowledge is limited in that way and perception distorted and hobbled by imposing certain official premises. There are unspoken findings and knowledge that were written for centuries by the great minds of the mankind from the classic times until today. This generation of young people who live in the era of information technology has an access only to the writings of the authors who found their place in the computer memory. It seems that there is new "Dark Ages".

The importance of this book by Obrad Ž. Maričić is of displaying the excerpts from classical and world literature in general and trying to

"open eyes" and to point to the readers the history of Serbian people in time and space, which is systematically suppressed in the world and changed according to the needs of those who have the greatest impact on the community and hold power in their hands. Every government, a political party, the state or the church tries to control the human mind, culture and knowledge and in that way subjugate and enslave people and adapt their knowledge and consequently the behavior to their needs and interests. From the recent history we know that various totalitarian regimes such as Hitler's national-socialism, Mussolini's fascism, communism as well as the Roman Catholic Church changed the "history" according to their needs and in that way to control, censor, restrict, and mislead the world they rule over. In today's world, thanks to the progress of technology, the European Union, the United States, NATO and Vatican perform manipulative politics redrawing the history at a much finer and more subtle way, more difficult to recognize, but far more successful than the methods of earlier times. It's a kind of aggression over the mind and understanding of subordinated subjects.

Historical facts indicate that the Roman Catholic Church, with the help of the Western European states, led the struggle against Eastern Europe for centuries, against the Byzantine Empire and against the Serbian people who inherited the tradition of the Byzantine Empire after its destruction by the western countries and the Roman Catholic crusaders. We know that the Crusaders were going to the East not to free and protect the tomb of Christ, but to destroy Byzantium and Orthodoxy. Many books could be written about what kind of documentation Roman Catholics have destroyed and how they perverted the historical facts to mislead the public to achieve their goals. While doing that they stopped at nothing. They fought with "fire and sword, the pen and the word" because "the end justifies the means." Thus during the early fourteenth century (1303 years) Popes ordered that all the means could be used in the fight against the East and Orthodoxy, including Serbs. They stated:

"There is no salvation outside of the Catholic Church. All the people have to convert to Catholicism."

"Greek Orthodox Church is not a religion."

"All the peoples' memories about the Orthodox Church have to be erased."

This book written by Obrad Ž.Maričić of more than 600 pages, with numerous maps, statements, illustrations, and stated documents is exactly opposed to this listed aggression of the West. At first glance, the reader gets the impression that the text of purely informative and that the author wants to introduce the reader to what exists in the world's literature that it is not easily available. However, this book is something completely different. This is a form of struggle against aggression and against the violent change and distortion of history, against the imposition of false and deviant ideas, forcing people to think, believe and accept the "truth" that aggressor impose upon them. The author of this enormous work has shown that the free men are those who thinks for themselves, regardless of the rulers, the desire of politicians and social conditions, and are willing to put at risk everything they have, in the struggle to convey their knowledge, experiences and beliefs. Thanks to these people the knowledge of the whole world progresses through history, spreads and deepens. Imposed science, influenced by various world centers of power over time has managed to destroy a lot of descriptions of presence, movement, and material documentation; they destroyed many people and many ideas that are interfered with the people who had power. Not only Serbian people and its history had such fate, but also other nations in the world, such as the destruction and removal of all the traces of memories of Native Americans' culture in the U.S. or the destruction of indigenous cultures in South America by the conquerors and the Roman Catholic missionaries, the Jesuits etc. Unfortunately, the West, particularly the United States of America forgot the words of their father of the nation, Abraham Lincoln, who wrote and said a great truth: "You can lie to one part of the world a certain time, but to lie to the whole world forever - it's impossible."

Therefore, the author of this book, as opposed to imposed "science" says and states many facts induced by reliable evidences. He points out first of all that, "Serbs were and still are great historic people".

Second, "Serbs have a parallel life. The one is in real life, with reduced history, and the second, the secret one with the real history."

Third, the "age of the Serbian people is not measured from the seventh century as we are falsely taught, but they exist through millennia."

Proceeding from the understanding that each book should be read carefully and with understanding, not to retail its parts and its contents, we will stop at that expressed thought. Each reader would be able to convince themselves of the significance of the evidence. They would be able to compare the facts with the things they had learned in school and through through media, and through the words of rulers and politicians.

The author of this book Obrad Ž. Maričić has an outstanding ability to communicate in different ways to readers about his ideas, about the insights and knowledge he has acquired through many decades of research. Everything that was expressed in the text of his book, he successfully repeated in the lyrics of songs that are included in the text. With these selected verses we finish the review of this book by Obrad Ž. Maričić, "Historical parallels of Serbian people through millennia."

**"I'm eager to learn the truth,
Show me the way to find it.
But those who knew the way
Were mean and didn't want to tell"...
..."Write everything you know,
Everything you have found out,
Because the other who knew the truth
Didn't want to tell it to their people"...**

Academic Professor Dr. Srboljub Zivanovic, Director of the European Institute for the Study of the ancient Slavs, London, United Kingdom

A great friend, a poet, publicist, erudite, big in heart and spirit, Obrad Ž. Maričić defies anyone who does not wish to receive the word of truth. He gives his writings to all of us to get through his word and Word of Love and knowledge of all those who love and appreciate their Serbian people to rise high and reject arrogance and ignorance.

Our dear Obrad gives himself to us in the best way: by word, through image, through all those who stood with the truth about the Serbs.

There is nothing hidden that will not become public, and what is whispered in the chambers, would be shouted on the roofs.

His courageous and honest work on the conquest of truth led him through the Scylla and Charybdis of all possible and impossible obstacles which he removed with his poetic words, and he encouraged themselves to endure just a little bit. The book " The ancient call of truth" for him was the call from the distance of all known and unknown characters of our great history. He shaped his emotions with the words and simultaneously praised and objurgate. He praised those wise and great, and objurgated the less wise whether big or small. History is a strange thing. Everyone would like to come inside, but it is the judge itself like a 'true' machine. I see no greater evil for the Serbs as a nation then the poorly written history.

Instead of people making peace, those who wrote the history wrongly learned that they can bring benefits for themselves only if lie becomes truth and what is right we all laugh about.

We are the greatest witnesses of our own history. Older people like us have an obligation to give younger generations knowledge that will be useful for them and to learn who we really are. But, if we haven't learned the good history, it means that the whole world hadn't learned good history.

In this book, the author wants through the word of poetry and scientific truth to show one big NO to a not - good history.

This NO is not just from one man, but from of the entire well - thinking people who invest their energy expanding their knowledge, which is used later for something new like new vine in new cups.

From these cups of new good wine of Obrad's book we all drink and enjoy its sweetness.

This is truly a unique book because it is for the first time a combination of poetry and ancient history of the Serbs.

Cheers!

Academician professor Dr. Radivoje Đurin Mančić

In Nis, on 08.05.2012

Obrad Maricic, a poet, essayist, journalist, historian, advocate for the truth about Serbian national being, with this book he accomplished his old dream: to try to unite his vast knowledge of his Serbian people, and in the same manner as the encyclopedists to overview the state of the science of Serbian history until now.

His name, OBRAD means "handling, processing, cultivating" is a very old custom that says something about the process - earth, metal, wood. So, it is related to the period of 5508 BC. This period can be taken at some point as the year of creation of the world, and for me, as I pointed out in my second book, this is the period of the production of Copper, who was connected with God BAK who was actually AR or Osiris.

Metal processing has led to cultivating land, the beginning of our literacy and the rise in heavenly level.

This book will surely delight everyone, especially our dear OBRAD.

Academician professor Milos Grozdanović

In Nis, 08.05.2012

The book "The historical parallels of Serbs through millennia" Obrada Maričića provides a new standard in the analysis of Serbian history because it gives insight into the history of Serbs in several levels. He analyzes, beside Serbs, many other people whose existence is confirmed by the theory of branching of the peoples, knowledge transfer, and the establishment of a new system of human values as such.

With this book once again confirms the hypothesis that when the study of history to goes with certain moral scruples, you must open a new horizon to suggest that the effort invested can be well rewarded.

The standard method of processing history of some nation mainly handles with written documents, then treatment of the archaeological findings. The first two methods were ruled up to the invention of carbon dating of artifacts from the C14. So, physics and chemistry necessarily had to enter a series of technological processing of necessary data. It is now supplemented by using chlorine-H16, which gives a deeper age dating. However, the method complements DENDRO C14 method so called analysis of charred pieces of wood if you can find on the same site.

However, there is also another method, the analysis of speech and words. Most deserving of this great American scholar, William Albright, who said:" The language is more scientific evidence than the archeological finding". This scientist investigated Kumran manuscripts, and thus gained worldwide fame.

There have always been migrations of peoples. Sometimes there were no limits as now, so they went until they ran into a very large obstacle, water - river, sea or mountains, or someone who is very well known to defend its territory.

One of the greatest world archaeologists, Gordon Childe, a British, said that the ancient inhabitants of Great Britain came from the former Yugoslavia. It then seemed like a real bomb for everybody, and there were many to deny it.

The problem that exists in the science of peoples and mankind in general is a subject to many clichés, which are sometimes so dangerous that it is almost impossible to exceed this limit.

However, science in the world is progressing so fast, that it is time to look the truth in the eye.

The truth says: application of new scientific methods with the help of mathematics, either through mathematical analysis, either through the use of new technical equipment - computers, probes, thermal scanners, etc., or genetic methods is in relatively short time made a verbatim miracle.

One should add that there are a huge number of scientists and researchers with new methods of reading the starry sky, they read the old sites using the new methods, make overall reconstruction of events.

I have to mention some of them, because they believe that their ideas and inventions penetrated deeply into the dark area of science, and give us new insights which definitely destroyed the old order.

Dr. Zecharia Sitchin, American scientist, who researched Sumer, Egypt and other ancient civilizations, came to the conclusion that there was a documented record of the existence of the twelfth planet, the planet Nibiru, which nowadays makes a confusion of what it actually is. It also indicates the existence of the first mountain Gebel Serbal in Sinai, Egypt, and the existence of timeless civilizations on Earth.

Graham Hancock shows along with Robert Duvall that knowledge on the movement of the Earth and our entire system is completely mathematically designed more than 10,500 years. In my second book, "General World Theory", Volume II, I showed that the official historical science was attacked from many sides with purely mathematical methods. "Starting from Ser Isaac Newton who performed a thorough study of the Bible, and shorten the historical time for nearly 1800 years, there was a large number of scientists who are in turn structurally showed that some foundations in the history of science have changed ... Italian-born American archaeologist , Livio Stekini, Livio Catullo Stecchino (6 October 1913 - September 1979) showed that there is a connection between the ancient civilizations of Egypt, Greece and Sumer, and that the relationship forms a triangle. Specifically, there was a connection between the prophets of old, and to the vast distances: Metsamor in the Caucasus, Dodona in Greece, Behdet and Thebes in Egypt. The position is indicated not by accident that not only the position of the triangle, but that the very

arrangement was intended, not accidental. The question that follows is: how is it possible for a civilization that is persistently rumored to have existed independently of each other had the ability and knowledge of the prophets of their deployment on specific positions.

So, it means that they knew about each other. How?

Picture no. 9 The Triangle, which consists of the prophets of Dodona - Metsamor - Egyptian Thebes

Picture no. 10 The triangle consisting of the prophets of Greek Thebes - the Harrier Colchis - Egyptian Thebes

Picture no. 11 Prophetic places allocated per octave

Picture no. 12 Prophetic places of the characteristics

Precisely, mathematics can give such strange answers. This problem in the official science does not actually exist, but there are people who constantly make questions and watch to find something strange behind all this. The question is: HOW CAN OMPHALOS BE PLACED AT ALL THESE PROPHETIC PLACES ACCURATE TO 10 DEGREES LATITUDE ON SUCH GREAT DISTANCES?

Today's science, doesn't matter how " big" it is, doesn't know how to explain something so obvious and great: Pyramids and Stonehenge and Teotihuacan.

This book attempts to do exactly that: TO EXPLAIN WHEN, HOW, WHY AND WHO MADE PYRAMIDS, STONEHENGE AND TEOTIHUACAN.

I had received much help from Mr. Robert Temple, who, with his book "The Secret star Sirius", finally remove all my doubts. All addressed to the fact that star Sirius A and its companion Sirius B was the most emphasized point source of religious forms on Earth.

In my first book, I tried somehow to connect the history of the Serbs with the stellar pair of Sirius. I managed to show that the star Sirius A is directly related to us, the planet Earth, but also to Serbia and Serbian people. Because a starting point set as the center of all events is in the sky star Sirius A, and on Earth it is Serbia and Niš.

I experienced because of my discovery much praise, and ridicule, "Because how that happiness happened just to us". But, "it just happened".

**Robert Temple theory is that: there is the legend of the star Sirius in Europe, Africa, Asia, China, India, so it means a very large area. It meant that they had a place where it all dispersed. I was brave to place the center in Nis, Serbia as a territory from which it leaked to great knowledge. Thanks to Google as the biggest search engine, it turned out that the setting of my ring with the center in Nis was a very good state. Robert Temple speaks of the Dogon tribe in Mali and their secret surrender associated with Egypt, Sumer, China, India etc. On Figure No. 13 Robert Temple, among other things, quoting Carl Sagan said that" ... it suddenly occurred to a large turnout of civilization that are associated with some intrusion of civilization in Egypt, Sumer and the Indus valley around 3500 years BC ... ". A similar thought is shared by the great Indian philosopher and politician Sarvepali Radakrishnan, a British Egyptologist Volis Badza, and other professionals who definitely come to the conclusion that someone has done some great strides over night!
Picture no. 14 Anatoly Fomenko.**

With all of my cognitive process that I conducted using using a mathematical model of MY FIRST EARTH FLAT DISC, I can freely say that it did civilizations emerged from these areas, specifically the area of the first ring.

And at the end, a great Russian mathematician and historian Anatoly Fomenko began a research through statistical analysis of the model where there are very precise dating epoch, events and people, that leads to new solutions that are as fascinating as Sir Isaac Newton's discoveries, and that is: reducing the time and predating events of all existing conditions.

This long quote from my other book "General World Theory" Volume 2, shows the horror of mathematical thinking disturbed science from ancient times, and since Sir Isaac Newton's discoveries it became a nightmare in a lazy academic brains.

But that's not all. German Renaissance and romantic cry of Aryans caused the first degenerate theory of Indo - German. It was because of the outcry of London and Paris, that Berlin responded with another theory of Indo - Europeans. The Germans made good for themselves, but they blindfolded everyone else, and they were all lost because of the result that all the people learn completely WRONG HISTORY, THEIR OWN AND OTHER PEOPLE'S. GERMANS ARE AT THE FIRST PLACE.

It would be great if it was the end, but it wasn't. Three theories

of chaos that I said in the preface lead in the shaping of science into darkness and chaos, where the skillful intervention the theory of probability draws predetermined conclusions.

All the people ask Darwin one question: "Why monkeys, where is God, does he wonder something?" Completely collapsed in his abnormal theory, he wrote a letter to his friend and asked if he can ask to be buried in the churchyard of their church, because he didn't know whether they would forgive him the things he had done.

Dr. Srboljub Zivanovic asked a question: if the Cromagnons disappeared, why the Serbs have a knurl on the nape of their heads as they had? Cromagnons otherwise had greater cranial capacity than the current one. If Darwin's theory is correct, that the primate brain evolution, increasing in size, how the people who had a larger brain volume disappeared and appeared to be a new man with a small volume of the brain? The answer is simple: People do not disappear, nor Cromagnons, or Azilianses there is only a transformation of society's continuation of learning. That should explain a formal matter how the Slavs came in the seventh century of this era, and suddenly began to build major cities and rivers new names and so on. Something similar amazing things happened to Egypt. How was it possible that Roman Empire suddenly disappear, as if it never existed? Who's behind the Cromagnon, the Roman Empire, Slavs, Hegel, Charlemagne, and the Vatican?

Why was the knowledge of the greatest minds of the world: Thales, Anaximander, Anaximenes of Miletus, Pythagoras, Plato, Aristotle, Philolaus Krotonskog, Democritus etc cross over?

Why did Hegel have the courage to underline the term "passed philosophy" and attach themselves attribute "final" philosopher?

That is where this book Obrad Maricic appears, to try to give an opinion. **THOSE ETERNALL PARALLELS OF SERBIAN PEOPLE ARE HISTORY WHICH ARE DOOM TO THEMSELVES, AND JUDGEMENT TO OTHER.** This judgment is not final, but it is the discussions with the past and present.

The book has ten chapters and each one is its own world, which gives a kind of recapitulation of the segments that Obrad thought would fit. But he has this uncanny courage to the space to those that he considers his comrades, but the part where he represents himself as a poet of antiquity, as a travel writer, as a driver for the magazine, as an organizer for the actions of lectures on ancient history of the Serbs and so on. **HISTORY AND POETRY OF OBRAD Ž.MARIČIĆ IS HIS PERSONAL STAMP**

AND HIS DOOM AND JUDGEMENT.

**Endowments of Stefan Nemanja
to St. Sava and the Serbian people**

**Evening searching listened to me my Lord,
and Your gently heart, open for me at the moment
and encourage and to utter, if I could,
what I think and hide, what I whisper and made
and what other and mine put on the back and suffer.**

**This evening my search hearken, O Lord,
and be merciful to me a small.**

**Loved my son, light of my eyes,
consolation and feeder of my age,
closer to the time of my departure.
Hear my last words,
and let not dried up Easters of my life,
keep them in your heart.**

**Remove from yourself the harsh mouth
offensive and lips away rejected from himself.
Your eyes see to see the right
and your eyebrows to show with the wink
to what is right.**

**Right walk with your feet
and improve your paths
turned neither left nor right,
because the roads which are on the right, God knows,
and they from left are destroyed.
And you learn what is right,
and your walking must in peace to be.**

**My son, your hand is skillful in pen and paper,
God has ordered you that you clearly the first
wrote in the book of the people in this world,
to ever know that we were, that we are and that we will**

be.
**The people who does not have their books and their
letters cannot be called people.**

**Written word is longer than the spoken word
uttered from the throat which the hail and
ears that have heard.
It lasts forever.**

Travelogue

The twenty third of May, the first year of the third millennium, I passed from the capital of Baden-Württemberg (Stuttgart), the northern Nord Westfalen, Visiting cities Düsseldorf and Wuppertal.

In Wuppertal I was warmly welcomed by my old friend, but until then unseen collaborator by name and nickname of Dusko Jovanovic Zeja - a great artist.

About his artwork did not know much, while the matter of his works has never met. It will take me time to reconstruct, in pictures, his - on classical themes-part, from which we will be clear and true-in fact - WHOLE.

He paints the past back ten thousand years before Christ. What you wisdom! Such talents can be bestowed only by the Supreme Lord God.

To this day, at the City Library was contracted to promote our common - his paintings on classical themes, and my three books inspired by antiquity, and titled:

1. With the song through history from ancient times to the present day
2. BLIND SIGHTSEEN Of Serbian people
3. The ancient call of truth - thousands of years ago.

The ritual began from Adam and Eve, the first inhabitants of this planet, in a quiet, spiritual, divine ceremony.

Through millennia of years, from primordial times, through the customs and costumes, we came to the present day.

Looking at the Cultural-Artistic Society JELEK from the same town, who participated in our joint promotion, the man can not be abducted of feeling that this costume dates back to primordial times, whose flamboyant flutter-style shows the old days.

While the architect Ivan Nikolic was reading the text in German language from my book (which he translated by himself), in the deepest silence the program was followed by highly polite audience.

The verses are read in two languages, Serbian and German – about Germans who never learn the truth about themselves, neither who are, nor where they came from.

After promotion we left with indelible memories - to a memorable how to organize these and similar celebrations. When I started selling books, the audience formed a line. Germans were very interested for the ancient part of the book, because they wanted to read in their own language.

The next day, May 24 - on Ascension Day, I said that I would like Dusko to visit the newly built church in Düsseldorf. There were no problems. With a new friend John Nikolic, while were driving to Dusseldorf, we chatted about the previous day. He was also interested in history, so he asked how all this was possible, but was hard to him and me that Serbs are not interested in their origins.

We arrived with some delay in the liturgy in newly built Orthodox church, which is served by Father Archpriest Sretoje Dušić.

After the Liturgy John and I had a short interview with the priest, to whom I gave a copy of my book as a present.

Due to the rare copy and the contents of the book, he suggested me to give a promotion to their premises, so I gratefully accepted for late September or early October that year. So we finished this brief discussion and agreement about the promotion.

I pleased Ivan to take me to Rail road Station, so I took the first train back to Stuttgart. After two nice days spent in the company with the newly acquired friend, I realized that I'm not alone in this business, that there are still more Serb patriots and it is worth to continue to fight for our survival.

24 May 2001 Obrad Ž. Maričić
On Ascension Day

With this I will finished my itinerary, not to say journey because I typed all the perceptions of the way, and there were very many.

REPRIMANDED SOUL OF SERBS

Serbian mother of the noble race
Which degenerate race of degenerates,
And in them so big evils,
And it takes a long time ago,
Even before the Kosovo battle.

Until these daily days
Serb raised his hand on Serb
Fighting for some third side,
Not caring for their sins,
That the descendants will suffer from their sins
- And still cursed them bitterly.

Reprimanded soul of Serb
Your grief still does not see the end,
Don't you see or you don't want to see,
where this age-old mutual quarrels lead?
For that someone took care,
For a purpose that Serb for a third side died.

Our present day, Ascension Day,
Lord God with all the saints,
Spare the Serb, the slave of yours,
Do not hurt one for each other,
While he is in the service of a third side.

**To us, these despots do not plague
like other nations,
Mayans, Incas and Indians
for whom they made travel reservations,
so they now show them to tourists
as tourist exhibits.**

**While traveling in the direction of the fatherland,
my thought back over the past centuries,
once upon a time we were here,
in Ulm we had bordered by France.**

**So Romans also wrote
that they Slavs are found here,
who called themselves the CHEKI.
In the north of Germania
still live people of VENDA civilization.
When the Romans overpowered
the Germans disappeared.
In the area of Scandinavia today,
German before us never lived.**

**By the fall of the Roman Empire
from India somehow came to our areas,
Indo-Germans themselves they called.
Today they do not know their origin,
they are afraid of history, because of their crime,
their OWN and OUR.**

**What kind of evil they had done to us,
to conquer space itself
for spread the Germanic race.
Fifty percent of Serbs were Germanized,
a with that they reclaim the space,
and from them Serbs persecuted.
With the blessing of the Holy CHAIR,
to work for a thousand years,
that Serbian names disappear.**

**Winning all our areas,
here they came to Kosovo,
in order to destroy all our monasteries,
because when you destroy a culture,
then everything will go easier.
For them there is no God,**

are not afraid of anyone.

**After Kosovo, with help of Islam,
they will continue to Rashka
and to realize their goals,
because when they destroyed the monasteries,
here will never be Serbs never again**

**With the demolition of the bridges on the Danube
thy kidnapped Vojvodina,
that also there suffered**

**Together with all the Serbian people.
And then they will divide Belgrade region
together with the rest of Serbia
into six parts to share,
that never more
Serbia will be whole.**

**This is the program of world order
that Serbs disappear from all over the world.
Again I raise my head to heaven
with praying I shout to the Lord God,
and today's day of Ascension Day
to rescue all Serbian nation and His eternal freedom!**

Obrad Ž. Maričić

Превод на енглески језик Милена Ранђеловић
